

Invitation to GE Multilin's Seminar on Industrial and Plant Communication Applications

Date: Monday, April 3rd, 2006
(Prior to 59th Annual Conference for
Protective Relay Engineers at Texas A&M University)

Venue: Ballroom 1 - College Station Hilton
801 University Drive East
College Station, TX, 77840, Ph: (979) 693-7500

Seminars Starts at 12:00 Noon with Lunch, Ends at 4:00 PM. There is no cost to attend this seminar

- Do you know what is going on in your plant?
- Learn how to integrate your existing relays, meters and various other monitoring and control equipment and access key troubleshooting & maintenance data.
- Design new electrical system with integrated control/protection and communication using industry standard Ethernet and communications protocols.
- Overview of various hardware and software options available from GE Multilin from simple data converters to Industrial grade Ethernet Switches and fiber-optic multiplexers.
- Learn how to apply the most efficient and effective protection, control and coordination using our state of the art IEC61850 standard defined communications built in the Universal Relay family of products.
- Integrate different manufacturer's device information under one simple system.

For those participants maintaining a P.E. license, a letter will be issued on your participation in the seminar. Course Certificates will be available for all participants who pre-register

[] Yes, I plan to attend the GE Seminar. Please specify your special dietary needs (like Vegetarian, Low Carb etc.)
