

GE Consumer & Industrial -  
Electrical Distribution

**Current Rating**  
45 Amperes

**Voltage Rating**  
1-pole and 2-pole - 120/240 Vac

**Frequency Rating**  
50/60 Hertz

### Molded Case Circuit Breakers Q Line

Type THQB/THHQB - Model C  
Long-time Delay and Instantaneous  
Time-current Curves

Curves show circuit breaker in open air, 40°C  
ambient, wired with conductors of  
corresponding rating, no prior load. For all other  
ambients, use rating shift index at top of sheet.

## DES-067 Supersedes GES-9888

#### Adjustments

Long-time delay thermal trip: not adjustable.  
Instantaneous magnetic trip: not adjustable.
