General Electric Company

Industrial Parts Repair on Allen-Bradley and GE

Repair & Return Offering

Our Repair and Return offering is the most economical method of getting your defective board or module repaired. Repair service is offered on our full line of industrial parts, including circuit boards, power supplies, SCR/Diode assemblies and selected core drives.

Features & Benefits	Repair & Return
<i>Extended 18-month warranty on entire board</i> Decreased total cost of ownership	✓
<i>Delivery</i> 20-Day Cycle (Emergency Service Available) Quick replenishment of on-hand inventory	✓
<i>Replacement of high-risk components on mature products at no additional cost</i> (ex: glass bead diodes, electrolytic capacitors) Enhanced reliability Reduced risk of future board failures	✓

Our experience and product knowledge enables us to provide prompt, comprehensive service for GE and Allen-Bradley products. With GE Industrial Systems, you get the same commitment to quality on Allen-Bradley repairs as you do on GE products. Let GE Industrial Systems be your single-source solution for your industrial repair needs.

GE - Quality • Capability • Resources
