See UPS Equipment in a Whole New Way

Experience...

Our UPS Equipment

- Watch a customized demo based on your data center or mission critical facility needs
- See complete system validation testing

Your UPS Equipment

- View the inside of your equipment for the first time
- Complete a Customer Witness Test with your UPS to verify the project specifications we're committed to
- Document your performance data

[CONTINUE](#)

The Lab

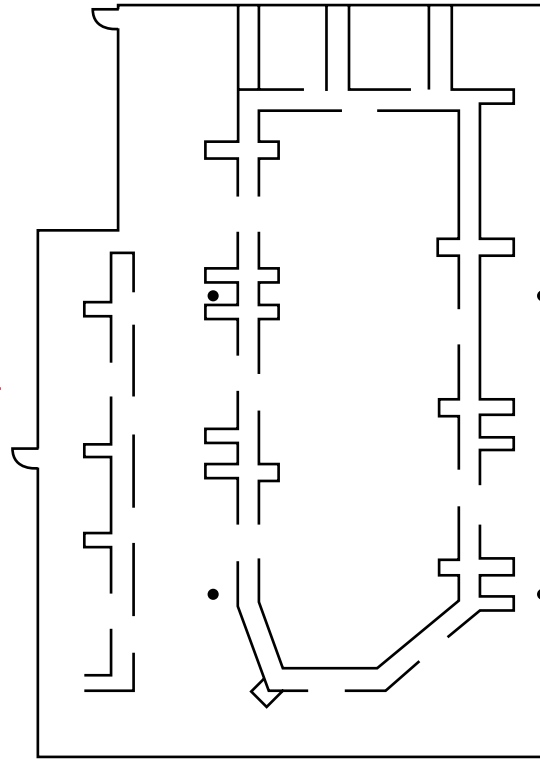

— What makes our facility cutting edge? We've covered our 4-foot trenches and the wires inside with yellow fiberglass for safety and accessibility.

— Parallel testing using Redundant Parallel Architecture (RPA)

— The Isolated Parallel Ring Bus features GE's EntelliGuard Circuit Breakers and B30 Bus Differential Relay, and provides a lower total cost of ownership and increased flexibility.

— Test up to four 1-MegaWatt UPS units

— Lithium ion battery testing.
